IMPORTANT.

The attention of Hardware dealers, Car and House builders and owners is respectfully invited to the

Petent, Never-Falling, Self-Locking

"Window Fast"

This is decidedly the best and most important invention of modern times. Its simplicity and wonderful adaption both for house and car windows is perfectly astounding, accomplishing everything that can possibly be desired, and yet being cheaper than any other window. For those windows which are dispensed with the weight and pulley system, such as sliding windows, etc., it is only necessary to be raised or lowered as much, or as little as wished to secure ventilation, and yet be locked securely at every point, from the intruder or burglar, and will never get loose or rattled. It has the peculiar element of locking itself in whatever position you leave it. For steam or horse car windows they are finished in a variety of styles, making an elegant finish to the car windows, and the only arrangement ever introduced that has never failed.

For sale by all hardware dealers.
